The Immune Vital Support Spray

When more and more negativity appears on the earth, it is important to have remedies that are easy to use. When the tension and stress is high, someone does not sit quietly to find out something. It's too late for that. Especially for this type of situation, 3 sprays have been made. TheImmune Vital Support Spray, the Powerful Love Spray and the Quick Recovery Spray.

The Immune Vital Support Spray is made to turn negativity such as 5G radiation into love. Difficulties and problems that come your way are there to be solved. When there is a problem, there must also be a solution. Thepositive cannot exist without the negative and , like a leaf with a front and a back, are inextricably linked. You can't have one without the other. When there is tension there must also be relaxation, when there is fear there must also be courage, only at that moment you do not know where that is and how you can turn that leaf.

The Immune Vital Support Spray helps you on a search for your strength and vitality and ultimately ensures that you can turn what is negative into positive. You become a transformer of the negative energy. That is why it is so important that you wake up and no longer enter into battle, but look for the opposite. If you go into battle, for example against the so-called virus, then it will only be battle and war and you cannot continue because all your energy is spent on that fight. You become more vulnerable and end up trapped in the pattern you wanted to fight against.

The new spray works on different levels. Schüssler contains cell salts for physical support and change on a physical level. The blossom remedies ensure that the insight comes, that you are open to your own power and love and that you can manifest this. Because the body receives the new information through the cell salts, the consciousness and love for yourself can integrate faster through the blossom remedies. The essential oils are the catalysts. They set the whole in motion and stimulate both the mind and the body to bring the whole to a higher vibration, making it easier for a transformation to take place.

This spray contains 7 blossom remedies. **The Protection** is a combination for protection and trust. It ensures that you stay better with yourself in negative situations, tensions and in a negative environment. Protects you from the leakage of your energy and makes the aura stronger. The **Cell Energy** brings a person back into line with his/her original task on earth. Due to all the negative influences, the cells lose their original structure and a disturbance in consciousness occurs. Because of the Cell Energy you no longer have to clean up all the old first. It solves the blockages, and you can charge yourself to your original source. The **Dog Trotter** strengthens the confidence in yourself, regardless of where you are. It allows you to grow, develop and expand and gives you strength and abundance. The **Herb Stir Me Does Not** protect the space around you. She recovers from an energetic leak and helps with the processing of old trauma. The Herb Stir Me Not is important when you are too sensitive. The **Mycena** is a good cleaner of radiation and improves your connection to the earth, especially important when everything around you seems like a mess. It has a cleansing effect and closes the aura when it is too open. When everything that comes at you has become too much and you can no longer get through the piles, the **Giant Stropharia** helps with tackling it immediately. She lets you act because you like it, not because you should or should. It helps you focus your attention on pleasure, especially when you're constantly busy in your head. It enhances the pleasure in your life and your work. The **Wild Bertram** ensures that you go your own way and that you make your own choices, without the influence of others. It protects you on the road you go and makes you listen to your own pure norms and values.

The spray also contains the **Immune Vital mixture** that consists of the cell salts No. 1 to 10, No. 19, No. 21 (zinc), No. 28 and No. 33 and works to support the strengthening of your immune system and vitality. (For the information of the numbers, see: www.celzouten.com.)
The mixture is particularly important when loaded by electrosmog, including 5G. This mixture provides a powerful connection with your body and helps to release old trauma when it disrupts your immune system. Gives you security and a strong connection with your body. It provides protection and strengthens your own identity, because you become more manifest who you are.

The spray also contains 3 essential oils: the Citroen withits refreshing, pure scent is a valuable strengthening agent. It activates the white blood cells and is an important means of cleansing. The Yarrow brings more light and integrity into the aura. Important in case of hypersensitivity and /or in the malfunctioning of the immune system. It is especially good support for the solar plexus. It keeps the aura alive and protects against negativity. The Grapefruit strengthens the zest for life and vitality, makes lighter and has a sparkling and light quality. It makes it easier to deal with changes and the new.

The spray is immediately ready for use and you can spray them directly under the tongue or externally at the site of the complaint. A nice natural help, which is especially important in this time when the immune system can use an update.
