Life Boost

The Life Boost is a combination of 3 flower essences: Tansy, Cell Energy and Sensitive Weed.

Good for the connection with your inner fire, your core and your love and strengthens the integration of your power to establish who you really are. This new combination helps you to find your core of love, to be part of the whole and to understand that there is no surrender when you really listen to that core of love. When you are part of nature, you can no longer see nature as a storehouse for the exploitation of materials, but you start understanding that you are nature yourself and that not everything consists of consumption and wanting to possess, but that it is all about sharing respect and love for yourself and others.

The qualities of the essences in the Life Boost are:
Sensitive Weed: the leaf of the Sensitive Weed plant close quickly when you touch it, while the flower shows the opposite and splashes out vitality and strength. In the plant you see the theme from vulnerability to strength. The stalks on which the twigs with leaves are attached contain sharp points. Taking up space and being open to your surroundings, but also being able to flexibly and withdraw back into your safe core. The Sensitive Weed is also important when you are too open and always keep busy with your surroundings, the other, because you can no longer go back inside. Being flexible and having core strength. Show your life force and bring it out. Who are you? Do not withdraw but stand for who you are and put this down. Even and/or despite feeling vulnerable and/or hurt, still have the guts to show yourself. Expansion and growth when you are sensitive and/or hypersensitive and do not trust yourself in every situation. Sensitive Weed gives you confidence in your growth, strengthens your self-awareness and ensures that when you have taken over too much from your environment, you can let go of this and return to your original life force. Take the space to be yourself.
This is me and you deal with it whether you like it or not. Be protected by the light that is around you. Putting all your unique qualities into the world, as a new consciousness that can awaken.

Tansy: This one strengthens and opens you to the fire and power of light. With this reinforcement you can let go everything that no longer belongs to you. Being led by the light when you're trapped in the dark because you didn't quite know what to choose. Manifesting your fire and listening to your higher self and the way of the heart as the core of your existence. Am I moving forward or am I staying in my safe circle of certainties? Do I make new choices, take new steps or do I stick to the old and familiar? Listen to yourself and get to your core, clean up and purify yourself of everything that does not belong to you. This purification is necessary when you have not listened to yourself, because you doubted your core. The Tansy gives you the choice to live and any choice is good. Follow your inner fire, the light will shine in you and dispel the darkness.

Cell Energy: this essence brings someone back in line with his/her original task on earth. The Cell Energy cleans the cells of the patterns which are no longer needed. It is the bypass for the mind. You no longer have to clear up all the old things first, but you can start acting from your original source. Clearing old emotions is important, but it is also infinite. The Cell-Energy reconnects your cells with the original source from which everything originates, the “zero cell” and brings the inner cell of the human or animal back in line with its original task on earth. Man creates from this source and creates the universe with it. However, man gives this energy his own resonance, both spiritually, mentally, emotionally and physically. Due to all the personal influences of the human being, the cells lose their original structure and from this disturbance arises the disturbance in the consciousness of the human being.

Use: put 2 drops in 30 ml of spring water. Take 4 drops of this dilution under the tongue 3 to 4 times daily or take 2 times daily 2 drops direct from stock under the tongue.
